

1. Make sure to dispose of combustible garbage in the designated garbage collection bags

Aside from being able to dispose combustible garbage as per normal in the garbage bags designated by the town and put it out at the garbage collection points, you can also take garbage directly to the Tatebayashi Clean Center. In this case, you don't need the garbage bags designated by the town, however, a fee is charged according to the weight of the garbage being disposed. ※ Please refer to the Tatebayashi Hygiene Facilities Union regional garbage processing facilities section for more details.

What you can dispose at the garbage collection points

Food waste Remove all moisture	Paper diapers Dispose of the contents in the toilet Scrap pieces of paper 	Rubber Leather products Remove the metal parts
--	---	--

Tie the garbage bags tightly before taking them out.

Collection day

Every Monday, Wednesday, and Friday

Please acknowledge that the schedule during the May and New Year holiday periods will follow the schedule according to 2. Combustible garbage Collection Calendar.
Collection will also continue during public holidays without change.
We will notify you through an announcement in the local newsletter if there are any changes.

Time 8:30 a.m.

Put the garbage out at the garbage collection points by this time.
Please make sure to put your garbage out on the day it is collected, otherwise it will cause problems for others.

Please note:

- ◆ Tie up the opening of the garbage bags tightly so that the contents do not spill out.
- ◆ Remove the moisture from food waste before putting in the garbage bag. Also, please help us by processing food waste using a food waste disposer in your own home.
Part of the cost of food waste disposers is subsidized. Please contact the following for more details.
- ◆ Since items including used paper (newspapers, magazines, cardboard, drink cartons, scrap paper), PET bottles, used clothing, and plastic containers are recyclables, follow the instructions for putting out incombustible garbage (recyclables) and put them out on the designated day.
- ◆ Do not put incombustible waste such as ash, empty bottles, and empty cans out at the garbage collection point.
- ◆ Garbage generated from commercial, office, or restaurant activity (general waste from business activities) cannot be put out at the garbage collection points. Either request it to be collected by a garbage collector authorized by the town, or take the garbage directly to the Tatebayashi Clean Center yourself.

Pruned branches

Turned into chips using a grinder

※ Loan of the grinder requires submission of an application form

Contact a specialist to perform a maintenance checkup and cleaning of septic tanks

If a septic tank is not properly maintained, the waste will flow out from the discharge area and have a negative impact on the surrounding living environment. Because of this, a specialist needs to be requested to perform proper maintenance checks and cleaning.

Households with a septic tank that do not yet have a contract for these services are advised to start a contract with a registered septic tank maintenance inspector and a cleaning professional designated by Meiwa Town.

Contact the Tatebayashi Branch of the Septic Tank Association for inquiries regarding requesting a registered inspector to perform a septic tank maintenance check. ☎ 0276-74-5500
